On-Site Consultation Program

The On-Site Consultation Program is a resource for safety and health issues that is free to businesses. The US Department of Labor and NYS Department of Labor fund this program. It helps employers provide a safe and healthful workplace for their employees through professional occupational safety and health assistance.

The cost associated with a workplace injury can be staggering. There are both direct and indirect costs to the employer. These costs include loss of productivity, loss of staff, training costs, and staff turnover. Yet, employers can prevent this from happening. Each year the On-Site Consultation Program staff help thousands of businesses across the state by providing cost-effective solutions to safety and health issues.

Why should an employer consider using the On-Site Consultation Program?

- It is FREE and confidential to businesses and organizations in our state,
- Independent from state and federal enforcement activities, and
- It is helpful for both the employer and the employees

There are additional benefits of the Consultation Program to the employer as well. This program can help to:

NYSDOL: On-site consultation Program

- 23 farms invited DOL staff for on-site consultation
 - Not an enforcement visit
 - Tour farm site for safety hazards
 - Suggestions to address
 - Must correct serious hazards
 - Air and noise testing available
-
- SHARP program for small business that want to take the next step
 - At least one dairy doing this

Others

- Veterinarians (animal handling)
- Consultants
- Implement dealers
- Local Fire Departments
