GROW[‡]NG FOR TOMORROW

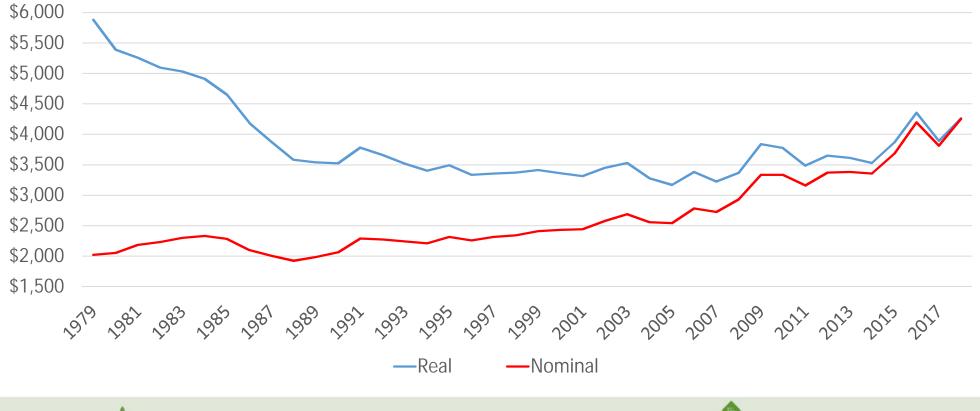

Cash Flow per Cwt.

Average Total Liabilities per Cow 1979-2018

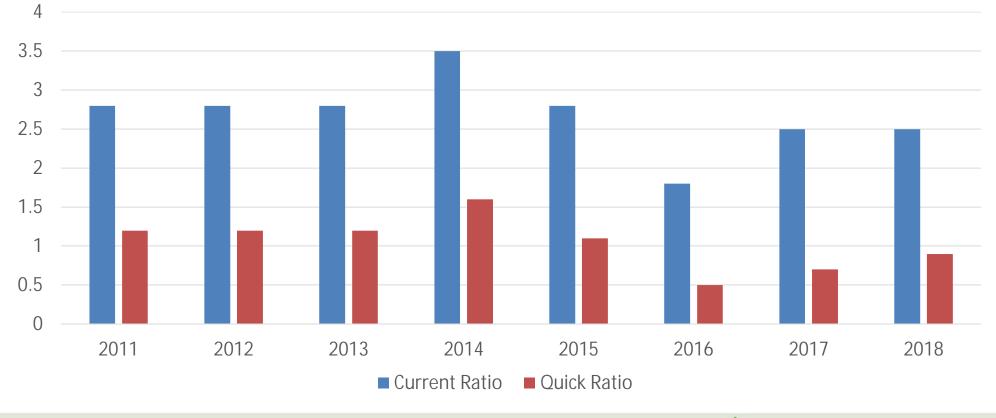

Average Total Liabilities per Cow 1979-2018

Changes in Financial Position

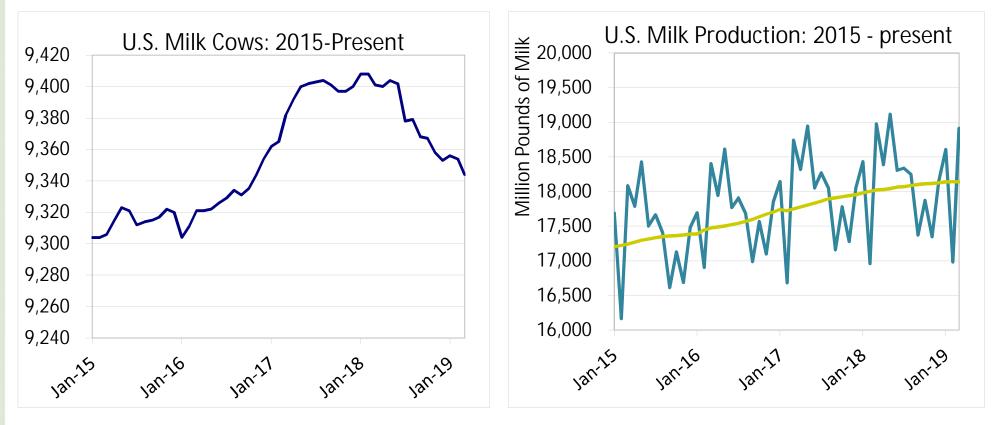

Conclusions from the 2018 DFS

- Profitability declined to a net loss largely because of a decline in milk price
- Wide range of results continues
- Positive correlations between farm size and profitability, however, not all large farms did well
- Farms in NY generally showed lower NCOP, even when adjusted for average size
- Many farms struggle with cash flow
- Milk prices have risen since last year, 2019 should show better results
